College of Medicine Policy on Relationships with Industry

Interactions between the health care industry and faculty, residents, and students are multi-layered and complex. Each situation should be managed with the aim of ensuring that our educational curriculum, research and patient care decisions are independent of industry influence and that they allow appropriate opportunities for faculty and trainees to interact with industry to foster collaborations in a creative, scientific, and conflict free environment. The College's policy on the *Management of Potential Conflicts of Interest with Health Care Industry* provides rules and guidelines for managing these relationships. The policy can be accessed on the main COM Student Policies page: <http://medicine.uic.edu/studentpolicies>
